Who are you? who? who?

I graduated with a BA(H) in Design for Film and Television from Nottingham Trent University in (2021) . I have now worked on several productions in the Art dept starting as trainee but have had my position bumped up during 2 different jobs to art dept assistant and most recently assistant art director, I have done fairly substantial graphics work and have made props for several productions, I do 3D design & printing using Fusion 360, Blender, Nomad sculpt and other software. I also regularly take online courses to improve my knowledge and skills. I love problem solving, work well in a team and enjoy getting my hands dirty and learning new skills.
